New 'COMTEC 290H' Ergonomic Desktop Enclosures

OKW has extended its popular range of 'COMTEC' sloping front enclosures with the new larger '290H' series. Typical applications will include data-collection units, measuring and control equipment, medical and wellness devices, point-of-sale terminals etc.

These modern desktop enclosures feature an attractive 'softline' design with a 10° ergonomically inclined operating area, which ensures fatigue-free operation of the unit.

The 'COMTEC' enclosures are moulded in off-white or black ABS (UL 94 HB). The cases are assembled by an interlocking system at the front and by two self-tapping screws at the rear. This simple and fast assembly system also allows access for servicing, if the cases are wall mounted. A separate wall mounting kit is offered for this.

The new '290H' versions have external dimensions of 290 x 200 x 76 mm, and complement the existing six sizes which range from 120 x 150 x 43 mm to 200 x 150 x 63mm. The top panel on all models has a recessed area for fitting a membrane keypad or product label. On the smaller models, optional battery compartment cradles can be fitted in the base section. These will accept one or two 9V cells, or four 1.5V AA cells. Screw pillars are provided in the top and base for mounting PCBs etc.

OKW can supply the 'COMTEC' cases with additional holes for push-buttons, connectors

and displays etc., plus silk-screen printed legends and logos, and EMC shielding. The cases can also be moulded or painted in alternative colours. Standard prices start at £11.

More information on these enclosures can be found on OKW's website at:
