Extended Range of 'TEKNET-B2' ABS Enclosures

Due to customer demand, TEKNO have extended their popular range of 'TEKNET' ABS enclosures with the new 'B2' models which have larger battery compartments. Typical applications include in-field test and measurement instruments, medical devices, data loggers and much more.

The ergonomic 'TEKNET-B2' hand-held enclosures feature 'soft-touch' edge grips for secure and comfortable holding during use. The edge grips also provide protection for the case mouldings. The standard case material is off-white, RAL 9002 or black, RAL 9004 ABS (UL 94 HB) with a modern textured finish. The edge grips are in contrasting light grey or dark grey elastomer, but these can also be moulded in other colours.

The four new models have external dimensions of 155 x 96 x 24 mm or 155 x 96 x 28 mm and feature larger battery compartments which will accept four 1.5V AA cells or two 9V cells.

The top and base mouldings include screw pillars for fitting PCBs and assemblies. All models feature a recessed top moulding for easy location of a membrane keypad, display module or product label. Assembly is by four self-tapping screws. Prices for the new models start at £14.

TEKO can supply the 'TEKNET-B2' enclosures with additional holes for push-buttons, connectors and controls etc., plus silk-screen printed legends and logos. The cases can also be moulded or painted in alternative colours.

More information on these enclosures can be found on TEKO's website at:
