RoHS Directive 2002/95/EC

We confirm that substances regulated by the EU Directive 2002/95/EC "on the restriction of the use of certain hazardous substances in electrical and electronic equipment"

lead, cadmium, chromium (VI) and mercury as well as polybrominated biphenyls and polybrominated diphenylethers are not intentionally used in the manufacture of our current range of above mentioned plastic materials.

Therefore we consider the requirements of EU Directive 2002/95/EC as fulfilled.

However, since the presence of the substances restricted by this Directive cannot reasonably be expected, the absence has not been checked by test.

WEEE Directive (2002/96/EC)

The EU Directive 2002/96/EC ("WEEE directive") defines the recovery of waste electrical and electronic equipment. Therefore we as raw material supplier cannot provide a statement of compliance, because this is dependent on the final article.

i. A. Klatt

The data indicated above are the results of our investigations and correspond to the state-of-the-art. The data refer to the state of the laws at the date of issue.

This confirmation expires after 12 months or in case of regulatory changes.

Please ask for a new confirmation if needed.

It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.
