

CONNECT

The optimum connection

The CONNECT enclosures range is ideal for wired and battery-powered mobile applications.

- New: CONNECT S with a width of only 42 mm is particularly easy to grip. It is ideal for remote controls, measuring instruments, test instruments etc. or as an interface enclosure with/without a cable connection
- two enclosure shells, convex and flattened with a recessed panel
- the two shells snap into each other, no screws required, this saves time during assembly, and you can also choose the front side of the device
- cutouts at both ends; to complete the enclosure, end parts and/or cable glands can be fitted
- CONNECT S & M in three enclosure lengths each to match the application exactly
- the enclosure shells and the end parts are made of UV-stabilised V-0 material
- protection class IP 40 (with end parts)
- integrated strain relief with the cable gland kit
- enough room for the installation of compact displays, LEDs and USB connectors and measuring sensors
- recessed surface to protect the membrane keyboard, decor foil or label
- attachment pillars for PCBs and components in the flat enclosure shell
- holding clamps for round tubes up to \varnothing 32 mm available as accessories (CONNECT S: 90/120 mm long, CONNECT M: 116/156 mm long)
- holder for secure storage on the wall or similar as an accessory

CONNECT

Applications and Examples

- Data systems engineering
- Network technology
- Building services systems
- Safety engineering
- IoT/ IIoT
- Medical and therapeutic applications
- Analytical instruments in the laboratory
- Measuring technology, including detectors with measuring sensors, test systems/instruments
- Data loggers in environmental technology
- Sensor systems

Gas leak detector

Noise level measurement

Process monitoring with temperature sensor

Receiver and data transfer for EMR

Tool for making colloidal silver solutions

Voltage and current display during trickle charging

Customising Options

What do you still need for your own very personal product? We can supply enclosures and tuning knobs with all necessary modifications for fitting your electronic components.
